MANUFACTURERS OF AND DEALERS IN COTTON NETTING

Cotton netting of a 1-inch-square mesh has been used to protect small fruits and grapes from the depredations of birds. It also may be employed to exclude birds from areas beneath the eaves of buildings where their roosts at times become objectionable.

This list of dealers has been compiled to aid persons who are unable to purchase netting locally. The inclusion of names in it implies no indorsement as to quality or prices. Names of other manufacturers or dealers will be added to the list upon notification sent to the Biological Survey that they are prepared to deliver netting of the type mentioned.
